

Industrial Bag Closing Machine NEWLONG DS-6AC

Automatic, single needle machine for closing bags with sewing.

When tightly closed bags are required (for dusty, powdery materials), the machine can be equipped with crepe tape adaptor.

The machine switches on and off automatically using either microswitch control lever or photo cell switch, which is activated by inserting the bag to the machine against the switch. The same way, when the bag leaves, the machine is deactivated by another photo cell switch. At the same time the thread and ev. also the crepe tape are cut off.

The parametres of the NL DS-6AC machine:

Maximal speed: 1400 stitches per min.

Maximal thickness of the material: 10 mm

Presser foot clearance: 62mm

Stitch width: 7 – 10,5 mm (standard set up: 10 mm)
