

## Industrial Bag Closing Machine NEWLONG DS-9C

**NEWLONG** Automatic single needle bag closing machine Newlong DS-9C is not only the fastest bag closing machine from the Newlong Co. assortment but also the most universal one. Excellent results are achieved in closing paper, all sorts of polypropylene and juty bags.

The machine switches on and off automatically using either microswitch control lever or photo cell switch, which is activated by inserting the bag to the machine against the switch. The same way, when the bag leaves, the machine is deactivated by another photo cell switch. At the same time the thread and ev. also the crepe tape are cut off.
