

Portable Bag Closer NEWLONG NP-7A

Portable hand held Newlong bag closing machine, type NP-7A.

New, highly efficient and durable type of machine with plastic handle and integrated oil pump lubrication system. Oil lines direct lubricant to main moving elements and ensure long working life.

Ideal for closing bags for agricultural products, animal feeds, fertilizers, flour, chemicals etc.

Heavy duty construction, safety and ergonomic design.

12V DC motor available for operating on batteries in places with no AC supply.

Improved looper and simple mechanism.

Steel cam for extra long life – no plastic cams.

Trouble-free continuous operation, minimum maintenance, low operating costs.

Built in thread cutting.

Easy sewing on horizontal surfaces, suitable for joining two fabrics (e.g. filter production).

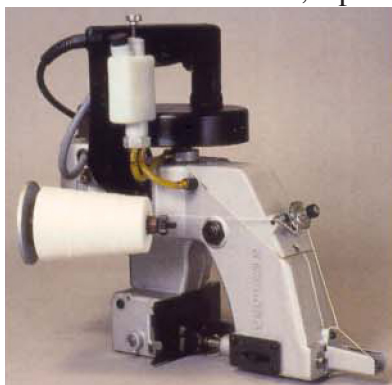

NP-7A is used in smaller production plants or in the bigger ones as secondary, reserve machine for cases of maintenance or repair of the main system.

Speed: 5 – 8 sec. / bag

Stitch length: fixed, 7,2 mm

Weight: 5,3kg incl. 0,2kg of thread

Motor: 60W / 50/60Hz, 1 phase, 12, 24, 110, 220 or 240V

Advantages of Newlong NP-7A:

High quality product made in Japan. Durable, reliable

User friendly, high speed of sewing.

Universal machine for closing all sorts of bags.

Full assortment of accessories and consumer material (threads, needles, bags) available for prompt delivery.
